

OnTrack Rehab

Market exploration of a digital system for arm rehabilitation after stroke

Help us shape the future of arm & hand rehab after stroke

We're a team at the Helix Centre, Imperial College London, developing OnTrack Rehab – a wearable-based platform designed to support arm recovery after stroke.

We want to hear directly from people with lived experience to make sure we build a solution that meets the needs of stroke survivors and their families. You don't need to be in the UK to take part.

If you or someone you care for has been affected by stroke, we'd love your input.

The survey takes about 7 minutes and your responses will directly shape the development of OnTrack.

Scan the QR code or click the link below to take the survey:
